ACADEMIC PROJECT(S)			
Creating a Credit Risk Model on Excel for a Trading Entity – Regular Model Rating			
<ul style="list-style-type: none"> I have created an excel model for credit risk assessment for a trading entity with defined range for parameters given. First, I have created an excel model for Financial Risk Assessment, by using IF & AND functions in excel which can automatically update a company's weighted score, if we change the given financial Risk Parameter Ratios of Companies. Later designed normalization of score and computation of total score by also taking Business & Industry Risk and Management Risk into consideration for whole score computation. 			
A Study on Valuation of Start Up's			
<ul style="list-style-type: none"> Studied Different approaches of "How Start Up's are Valued" and analyzed the different approaches and their effect on price valuation of equity shares and preference shares. Narrated the different examples of valued start-ups and their valuation methodologies. 			
Design Thinking			
<ul style="list-style-type: none"> It is an Academic Project on a Technology and Data Consultancy company named "SIGMOID Analytics" Solved their problem of employee attrition in their company. My contributions in the project were creation of optimal bonus plans for employees and creating creative employee training enhancement with collaborative learning platform which can increase competitive spirit to learn more and work more and HR supervisors can easily track the employee's learning completion and growth through this platform. 			
Infomerics Ratings – Corporate Project – Request For problem Given by Infomerics Ratings			
<ul style="list-style-type: none"> Successfully completed project with Infomerics Credit Rating Agency. Project was about "How can the Credit Rating Agency (CRA) maintain high standards of Accountability and Transparency with adequate measures to protect the integrity of decision making in ratings?"
