Class X (CBSE)	95.00 %	St. Joseph’s School, Nawada, Bihar	2016
AREAS OF STUDY			
<ul style="list-style-type: none">Financial Accounting and Financial Statement Analysis, Managerial Accounting, Corporate Finance, Design Thinking, Fintech Overview: Payments & Regulations, Sales & Distribution of Financial Products, Product Management for Fintech, Blockchain for Finance, Business Data Visualization.			
ACADEMIC PROJECT(S)			
Financial Accounting and Financial Statement Analysis: Ratio Analysis			
<ul style="list-style-type: none">A comprehensive analysis of ratios of 5 different companies to know about the financial position of companies.I analyzed how much debt a company has compared to its earnings or assets, how much profit a company makes compared to its sales or invested money, how well a company used its assets to generate sales by using key financial ratios and assessed the company's liquidity position and identified potential risk.Gained ability to work with financial data and identified strength and weakness of companies which showed financial health of companies.			
Managerial Accounting: Cost Classification and Allocation for a Beverage Brand			
<ul style="list-style-type: none">The project classified the beverage brand-Nestea's costs into direct (raw materials, direct labor) and indirect (utilities, depreciation) categories, providing a clear cost structure overview.To ensure accurate cost management, various cost allocation techniques, such as Activity-Based Costing (ABC) and traditional costing, were examined and used.The strategic recommendations centered around reducing costs and improving efficiency, making the best use of available resources, and improving production processes to increase profitability.			
Lean Canvas Analysis: Smart Calculator Solution for Small Shopkeepers			
<ul style="list-style-type: none">Conducted a Lean Canvas analysis to identify a business opportunity in the small retail sector. The project focused on pain points for users in traditional calculators and addressed the challenges faced by shopkeepers in managing daily transactions.A smart calculator solution was proposed, integrating hardware and software to streamline bookkeeping, provide real-time insights, an intuitive interface for recording transaction through calculator, and seamless integration with cloud services for data storage and retrieval and enhance operational efficiency.			
Developing Strategies on Navigation Problem in Village Hypermarket: Design Thinking			
<ul style="list-style-type: none">Applied strategy to create digital app and to place interactive digital screen in Village Hypermarket through user-centric ideation and Iterative prototyping to enhance navigation and customer satisfaction at the hypermarket.I analyzed data can highlight issues, but design thinking helps to identify the root causes by understanding users need and pain points.
