ACADEMIC PROJECT(S)			
Small Cap 100 Portfolio Analysis (Without Churning)			
<ul style="list-style-type: none"> Constructed a comprehensive portfolio tracking the performance of Small Cap 100 companies since 2012, maintaining a consistent dataset without entry and exit of stocks. Conducted in-depth fundamental analysis on each company, assessing financial health, growth prospects, and market positioning. Calculated cumulative portfolio returns and benchmarked against the Small Cap 100 index, identifying key trends and strategic insights for long-term investment performance. 			
Credit Rating Analysis and Predictive Modeling of NSE 500 Companies (ongoing)			
<ul style="list-style-type: none"> Conducting a comprehensive ratio analysis of NSE 500 companies using methodologies aligned with credit rating agencies to derive credit ratings. Developing and refining sector-specific statistical models to identify limitations in traditional credit ratings and improve prediction of potential defaults. Exploring alternative financial ratios and incorporating new metrics to enhance the accuracy of creditworthiness assessments. 			
Financial Modelling			
<ul style="list-style-type: none"> Developed a detailed financial model for Rainbow Children's Healthcare Limited, incorporating revenue projections, cost structures, and growth trends. Performed ratio analysis and book value assessment to identify valuation trends and support strategic investment recommendations. Created valuation reports to guide long-term financial planning. 			
Case Study on Acquisition of DHFL by Piramal Capital & Housing Finance Limited (ongoing)			
<ul style="list-style-type: none"> Analysing the strategic rationale and impact of DHFL's acquisition by PCHFL, the first successful resolution under the IBC in the financial services sector. Evaluating valuation methodologies, swap ratios, integration synergies, and long-term effects on Piramal's business. Assessing future growth prospects and implications for the broader financial services landscape.
