WORK EXPERIENCE(S)   2.7 Years

Lowe's India, Bengaluru	Accounts Payable Analyst	Jan 2022 - July 2023

I worked under P2P Accounts payable, responsibilities were,
- Accounting and processing of PO and Non-PO Invoices, expense and credit notes.
- AP aging reporting, investigating invoice discrepancies and follow-up with buyers, receivers and vendors as required.
- Handling vendor queries/Inquiries, vendor payments, vendor account reconciliation, etc.
- Communicate with the internal department to obtain necessary documents and approvals to process invoices in a timely manner.
- Preparing weekly and exceptional payment runs.
- Performing month-end activities, getting updated account statements from vendors and verification of the statements received.

Greet Technologies PVT. LTD., Bengaluru	Accounts Analyst	Oct 2020 - Jan 2022

- Worked with Tally ERP9 and Tally Prime for invoice processing within agreed SLAs, maintaining consistent accuracy.
- Matching invoices with two-way match and three-way match.
- Collaborated closely with internal teams to resolve identified issues and errors.
- Identified process discrepancies and worked with internal and external teams to address them.
- Managed vendor relationships including query handling, checking terms and discounts, and updating bank account changes.

ACADEMIC PROJECT(S)

Repurposing Dry Waste into Eco-Friendly Products

- Developed a sustainable waste management system in Electronic City Phase 1, Bangalore.
- Conducted stakeholder interviews, surveys, and workshops.
- Documented user stories and use cases and designed a solution with recycling facilities, public awareness campaigns, and an efficient waste collection system.
- Collaborated with local stakeholders and developed an implementation plan with KPIs.
- BRD Creation: Created a comprehensive Business Requirements Document (BRD) to define requirements and implementation strategies.

Restaurant Sentiment Analysis and Insights Extraction

- Collaborated in a team of four and extracted and analyzed 300+ customer reviews from 250 restaurants across Bengaluru.
- We sourced the data from Zomato, Swiggy and Google and conducted sentiment analysis on customer reviews to identify trends and patterns.
- Data manipulation was done in excel to extract actionable insights at a cuisine level to identify popular cuisines of each restaurant.
- The project provided a comprehensive view of customer preferences and also helped identify top-performing cuisines in the region.

Database management for a local bakery through PostgreSQL

- Gathered details about the shop operation, inventory management and delivery processes.
- Based on the above data, designed and implemented an ER diagram and developed a dynamic database management system.
- By running SQL queries, addressed key challenges identified in the analysis, leading to improved inventory management, delivery process and a boost in sales using data driven solutions.
